Billeecoin (BBC)

BilleeCoin (BBC) is an experimental decentralised meme token minted on binance smart chain (BEP-20) by Tadashi Nakamoto (anonymous) with contract address **0x0444BD0592B404C9dbB3a539FAB99b1e65a4fDe7** . Billee the Big Cat (BBC) was adopted as the token symbol with a total supply of one quadrillion.

Billee is my name and i am the big cat.

The aim of the token is to enable holders to trade on blockchain at lower transaction fees and at the same time benefit from commisions(70%) of an NFT project (BBC NFTs) through buybacks and burn quarterly until $BBC = 1. Billeecoin will be a utility token in the Billee's Ecosystem and is expected to be adopted in mainstream economies.

Tokenomics

A total of **1 Quadrillion of Billeecoins** were minted on bsc and the initial and current distritribution are as follows:

70% locked on pancakeswap liquidity with the keys thrown away. The initial liquidity will be provided from 70% of the initial sales of BBC NFTs. 70% of the commisions from resales will be used to buybuck and burn billeecoins until 1BBC = $1.

The other **30%** will be reserved as token in the Billee's MarsFund which will be

The other **30%** will be reserved as token in the Billee's MarsFund which will be managed by Billee's Decentralised Autonomous Organization.
There is no fund allocation for the marketing and development team but

donations from BilleeCommunity are welcome.
The **Percentage** of burned Billeecoins will be updated on Billeecoin.com under tokenomics section, however there is no presale coin burning.

MarsFund

The MarsFund is a decentralised contract that store 30% of Billeecoins as a token for the liquidity provided by BBC NFTs that will fund Mars and Space travels using the BBC NFTs.
To fund our future Mars and space voyages, **30%** reserved billeecoins in the MarsFund will be released to a viable space travel agency with a condition that each and every Billee the Big Cat NFTs be accepted as a ticket to mars or to the moon in descending order from Billee #1. The MarsFund could also be released to fund space explorations and all conditions and spendings of the MarsFund must be decided by Billee Decentralised Autonomus Organization through Voting.

Ecosystem & Roadmap

The expected timelines of Billee's projects are as follows.

How to Buy

Billee is now available on **Pancakeswap**. However, confirm the Contract Address on bscscan when trading on all dex platforms and centralised exchanges. Beware there are fake BBC out there.

Billee NFTs Collection

A collection of **1,000** uniquely generated NFTs featuring BBC on Binance Smart Chain with contract address **0x8960fcE401E00ecEd7EF1D6fC7187b34E8DbD4D1**. Each NFT is a unique **ticket to Mars or Space** to be powered by the Billee Project. 70% of commissions will be used to buyback Billeecoins and burn quaterly until $BBC= 1. The Billee's Project will gradually be transfered to Billee DAO.

Metamars

What to expect in the **Marsverse**. It is a super cool model of the planet Mars with all its natural features with the exeption of gravity which will be same as that of planet Earth .It will be a decentralised virtual mars on binance smart chain where owners of land can develop digital product of any kind on it. User will be able to intaract with one another in real time.

Billee DAO

Is a decentralised autonomus organization that will manage Billee Project through voting by holders of Billeecoins.
This smart contract will ensure that all the protocols of Billee Projects are followed through true democracy.

FQA

What is BBC ? Is the symbol for Billeecoin and also for Billee the Big Cat NFTs on binance smart chain.

Is BilleCoin Decentralised ? its a BEP-20 decentralised token on binance smart chain. Ownership will be renounced to Billee DAO and its liquidity locked forerver.

What is the Billee Ecosystem ? It includes BilleeCoin, Billee the Big Cat NFTs collection, Billee NFTs Marketplace, and Billee Metamars. This ecosystem will ensure the BBC token utility across all a wide range platforms.

How does the Development team get funded ? The team depends only on BilleeCommunity's donations and volunteer developers such as the creator Tadashi Nakamoto (Billee's Anonymous Creator).

Is BilleeCoin Deflationary ? Yes. 70% of commissions from BBC(Billee the Big Cat) NFTs will be used to buyback Billeecoins and Burn to reduce supply quarterly until billeecoin reach $1.

What is Billee the Big Cat NFTs? Is a collection of 1,000 NFTs featuring Billee dubbed the BIG CAT which is independent from billeecoin but with the intention of donating 70%(transaction fees inclusive) of its proceeds quartly to Billee's liquidity until Billeecoin reach $1.

Is BBC NFTs Decentralised? Yes. Each and every BBC NFT is unique on the smart contract. The commisions are split into Billee's wallet(70%) and Tadashi's wallet (30%). All transactions can be verified on the bscscan.
Billee's Wallet Address (DOA)
0x3C59dE6cc9B6C7Adb2518097E7909c94e4EE1a3e
Tadashi Wallet's Address
0xD2403C80B947B159CB64a29Ac451812A87aeAdFC

Is the Smart contract Verified ? Yes, it is verified on bscscan. And the presented tokenomics will be verified by Certic Finanace.

Do i Earn holding BilleeCoins ? No, there is no tax collected to be redistributed to holders as it discourages transactions. However, holders get benefits in terms of an increament in value overtime.

Who created billee Project ? The Project was pioneered by Tadashi Nakamoto, an anonymous and a benevolent blockchain developer. However, it will be managed by Billee DAO where decisions are made by holders of the token
